系统镜像开始下载了。下载完成后把一个至少8G的U盘格式化后插到电脑的USB口中

双击打开这个

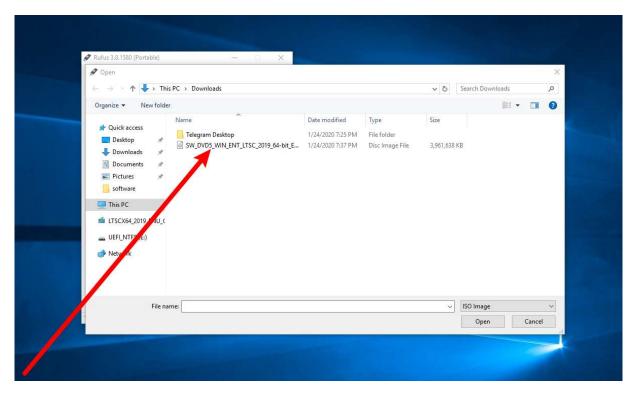

若弹出窗口,点击这里

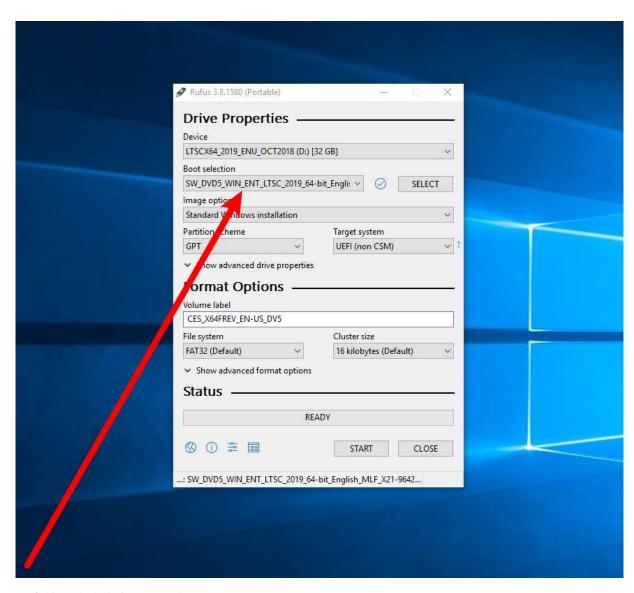

插入的 U 盘会显示在这里

开始制作系统盘了

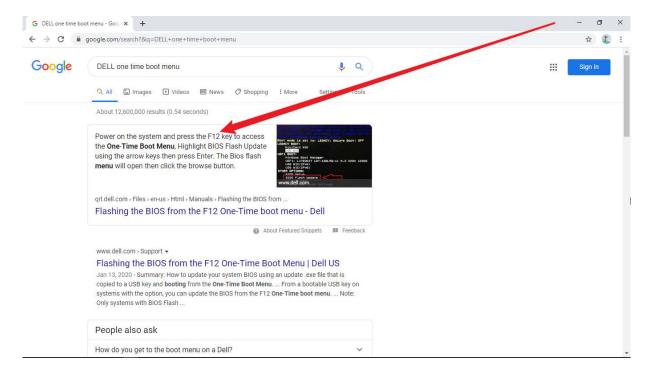

制作完成之后会弹窗, 点击这里

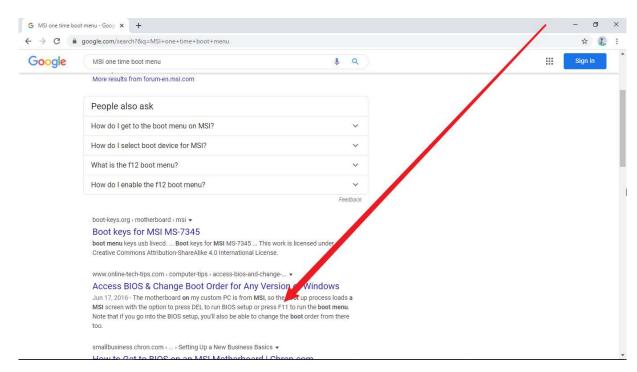

点击这里

假设你的电脑或主板品牌为 XXX,用 Google 搜索 " XXX one time boot menu ",找到你电脑开机进入 one-time boot menu 的快捷键。

比如戴尔电脑就是 F12

再比如微星主板是 F11

插 U 盘, 重启电脑, 在屏幕上出现 logo 时按下查到的快捷键

```
Use the 1(Up) and 1(Down) arrow keys to move the Press [Enter] to attempt the boot or ESC to Care

Boot mode is set to: UEFI; Secure Boot: OFF

LEGACY BOOT:
    Internal HDD
    CD/DVD/CD-RW Drive
    Onboard NIC
    USB Storage Device

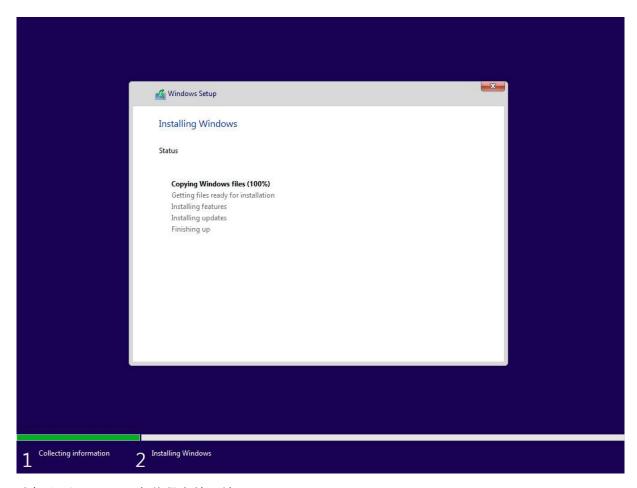

UEFI BOOT:
    Windows Boot Manager
    UEFI: Sony Storage Media 0100, Partition 1

OTHER OPTIONS:
    BIOS Setup
    BIOS Flash Update
    Diagnostics
    Change Boot Mode Settings
```

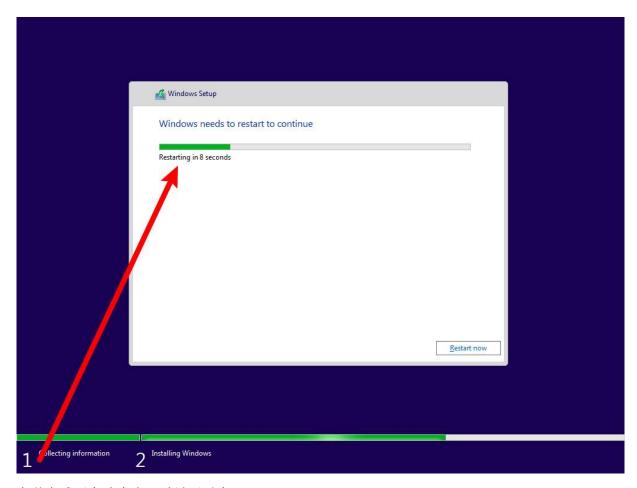

用上下键选择你的 U 盘, 敲回车

会询问你想用系统盘做什么,点击下面的那个"高级 仅安装"选项

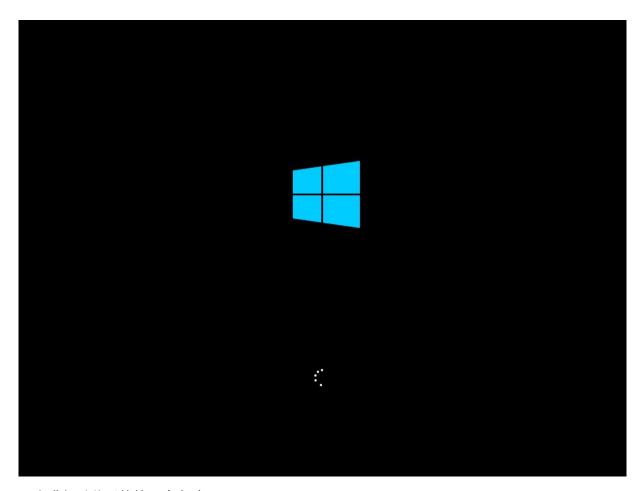

然后会让你选择将系统安装到哪个盘,选择之前记得要先将其格式化

选择之后 Windows 安装程序就开始了。

安装完成后电脑会在几秒钟后重启

正在进行重装后的第一次启动

接下来会让你对电脑进行一些设置,按照屏幕上的提示一步一步地操作即可。设置完成后就会进入桌面。
